

MODERN MUSTANGS

1st-3rd Graders

Coordinator: Julie Romig

Class Description: It is never too early for children to learn all that they can become.

Modern Mustangs is an after-school group designed to help children see all future possibilities by sharing stories of less conventional, remarkable people who have found success. In this eight-week session, we will explore positive character traits, discuss barriers, and inspire children to feel empowered in their own lives.

Early exposure to possible future opportunities is essential to realizing more underrepresented people in subjects like Science, Engineering, Leadership, Strength, Justice, Math and many others.

Planned activities include (subject to change):

- Exploring positive character traits through lens of Disney Princesses
- Women of "Hidden Figures" and simple rocket building
- Fire Science and burning bubbles
- Sonja Sotomayor and justice and equality
- Girls Who Code and a simple coding exercise.
- Famous women in Science and experiments/demonstrations

Material from GirlStart, Stemlikeagirl, Stemettes and others will be utilized in this uplifting after school experience.
